Don't change it. It was awesome!!

N/A

I honestly have no ideas on how this course could have gone better. I thought the guest speakers were engaging and passionate about what they were working on and the field trip day was really helpful. This excursion helped us see what we had been learning about in class and it really tied the information together. The course works were very helpful and made me feel less worried about the layout of the exams.

14. Please reflect on your experience in this course. Did the instructor foster a productive learning environment?

yes

One of the best professors I've ever had. Truly invested in the success of his students.

Professor LeVine is hands down one of the best professors I have had in my time at New Paltz. Now that I have taken him consecutively for 4 semesters (and taken every class he teaches) I am saddened to not have him again next semester. He is a brilliant professor with an impressive amount of knowledge on the topic. He is very approachable and has gone out of his way to take time to discuss graduate school options as well as career paths for the future with me. I am so thankful to have gained a mentor in Professor LeVine. -Ada B.

YES!!

This course was very simple to follow. If you do the coursework and keep up with readings you will do well. Whenever we didn't understand a topic you went back and helped us understand it, for example the pareto efficient scenario examples helped us. Everything went very well throughout the semester.

I loved this class - this is my third class with professor Le vine - he is very clear on his syllabus and assignments, his coursework is always great preparation for his tests he is very helpful when a student is confused or if accommodations need to be made. The guest lectures were particularly interesting, showcasing different professionals in their respective jobs within planning. As an education major, this class was informative and enlightening.

The layout of the class sessions was very organized and helpful. I never felt like I was lost during the classes and the material was presented in such a way that was very easy to understand. In addition, the professor did a great job allotting time for questions during each class. Overall, this was one of my favorite classes of the semester- keep up the great teaching!

The professor was very professional, helpful and made the class interesting ! I would deffinely take another class with him!!!

Well defined course, giving full details of issues surrounding planning
