Always study for exams

Thank you for placing the textbook under course reserve. It helps a lot. Especially because I need the money for rent. Please consider to suggest this to all departments, as professors do not always understand how bad the economy is for us. I know students who are homeless, but they put themselves through school only to become

more broke because they have been continuously told that going to school is going to make them happier/better. It makes a world of difference when we can spend the money towards food, bills, and/or rent. Please consider posting the PPT before we discuss them in class, this way student can follow along during the lecture instead of rushing to copy everything. Thank you for making this class fun to learn.

no changes needed!

great class environment

We were taught on the first day that geography has 4 components; litho, atmo, hydro, and ecosphere, yet we spent 75% of the class on the atmosphere. What gives?

more videos would keep me engaged

None

#### 14. Please reflect on your experience in this course. Did the instructor foster a productive learning environment?

This class was strictly a lecture class and there were way to many powerpoint slides, never had enough time to copy down notes, went way to fast.

Great class, great professor

excellent professor

Yes, but too many students did not care at all about the material. the class is almost always dominated by 2 students answering questions, because there is silence without them.

this is a great professor who knows what he is talking about, but because the subject matter is often boring, it can be hard to stay engaged. he is well prepared and overall a very understanding teacher with a fair amount of work given
