

## Action Research Project Rubric for SPA

		UNACCEPTABLE	DEVELOPING	TARGET
Depth of knowledge – empirical research	1.1, 1.2	Literature review synthesizes 5 or fewer peer-reviewed research studies of evidence-based practices that relate to the domain	Literature review synthesizes 6-8 peer-reviewed research studies of evidence-based practices that relate to the domain	Literature review synthesizes at least nine peer-reviewed research studies of evidence-based practices that relate to the domain
Depth of knowledge – theory	1.1, 1.2	Literature review correctly explains theoretical lens for all 0-1 evidence-based practices.	Literature review correctly explains theoretical lens for 2 evidence-based practices.	Literature review correctly explains theoretical lens for all 3 evidence-based practices.
Depth of knowledge – historically shared knowledge	1.1, 1.2	Literature review fails to accurately summarize any aspect of the historically shared knowledge regarding the theory, materials, and/or instructional strategies that relate to the domain	Literature review accurately summarizes at least one aspects of the historically shared knowledge regarding the theory, materials, and/or instructional strategies that relate to the domain	Literature review accurately summarizes at least two aspects of the historically shared knowledge regarding the theory, materials, and/or instructional strategies that relate to the domain
Critical stance	1.1	Literature review conclusion and statement of problem fail to demonstrate a critical stance on the research related to the domain	Literature review conclusion or statement of problem demonstrates a critical stance on the research related to the domain	Literature review conclusion and statement of problem demonstrates a critical stance on the research related to the domain
Appropriateness of data sources in <b>methods</b> section	3.1, 3.3	Does not utilize multiple data sources OR data sources are not aligned with research question	Multiple data sources were chosen OR data sources are aligned with research question	Multiple data sources were chosen AND data sources are aligned with research question
Accuracy and appropriateness of <b>data analysis</b>	3.1, 3.2	Data analysis is inappropriate for the selected measures AND data analysis is conducted with a lack of fidelity	Data analysis is appropriate for the selected measures OR data analysis is conducted with fidelity	Data analysis is appropriate for the selected measures AND data analysis is conducted with fidelity
