# 3D Printing: How to Survive Completing a 3D Print in Your Classroom from A to Z

This 9-hr course will focus on the use of 3D printers ( Access to MakerBots ) , specifically operating the machines and troubleshooting. It will include some exploration of 3D software, digital learning and curriculum design. All students will complete a project from design to print and incorporate it into their curriculum. Completion of this course provides in-service teachers eligibility to apply to borrow a 3D printer for your classroom through the Mid-Hudson Teacher Center or the Center for Innovation in Education (CIE@NP).

Participants may bring their own laptops.

# Concussion is Not Just a Bump on The Head: Supporting Students with Brain Injury

Presented by Margo Singer

According to the CDC, brain injury is the most frequent cause of disability and death among children and adolescents in the United States. Each year, more than one million children sustain brain injuries ranging from mild to severe. Children and adolescents are as vulnerable to trauma as adults; however the extent of trauma may not be immediately apparent because the child's brain is still developing.

All students are at risk, not just the student athlete. Problems seen in children subsequent to brain injury can include deficits in attention and concentration, memory, organizational skills, changes in behavioral functioning, social skills, and emotional control. Such sequelae often present significant challenges for school staff who struggle to meet their unique needs.

This training will provide teachers and support staff with an overview of brain injury in children, how it may manifest itself in the classroom, and how to respond --including a best practices protocol which utilizes a team approach within the school (REAP), and free resources available to school districts to help children, their families, and school personnel, including the BIANYS FACTS Program and LEARNET, an interactive computer program to assist teachers address the challenges posed by students with brain injury. The free FACTS Program is available to assist individuals who sustain a brain injury prior to the age of 22 and BIANYS has FACTS Coordinators in every region of the state.

# National Board Certification Awareness Session

---

Presenter: Sheri Altieri

Join us for an Awareness session around National Board Certification. National Board Certification is a growing education reform movement that is advancing student achievement and learning, developing and recognizing excellence in teaching, and improving schools. The process is also closely aligned to the new APPR process for teachers regardless of what rubric the district is using. Teachers who achieve National Board Certification have met high standards through study, expert evaluation, self-assessment, and peer review. Research shows that candidates for National Board Certification demonstrate significant improvement in their teaching practice—whether or not their candidacy results in certification. The process of analyzing and reflecting on daily practice during candidacy helps teachers focus on their strengths and gives them ideas for improving their teaching.

# *Fluency with Multiplication and Division within 100*

---

The goal of this training is to develop teachers' understanding of single-digit multiplication and division as they relate to the Grade 3 Common Core State Standards.

Strategies for fluency with single-digit multiplication and division within 100 will be explored. Strategies will include: arrays, repeated addition, properties of operations and the relationship between multiplication and division, (understanding division as an unknown factor problem). The foundational strategies will be applied in grades 4 and 5 in order to perform multi-digit arithmetic and more.

If you have students who are working towards, or struggle with, fluency with single-digit multiplication and division within 100, this workshop is for you.

**Presenters: Nancy Phelps and Eileen Panagiotopoulos**

## Multiple Voices: Dialogues about Supporting Students with Autism Spectrum Disorders (ASD) and Their Families

The Mid-Hudson Teacher Center, SUNY New Paltz School of Education, and PREP for Success will co-sponsor a panel discussion on supporting students with ASD in elementary and secondary schools. The event, moderated by Dr. Michael D. Smith from the Department of Teaching and Learning at SUNY New Paltz, will feature five panelists who will share insights from personal and professional experiences that promote positive academic and social experiences for students with ASD. The panel features Ann M. Martin, author of *Rain Reign*, who will speak about writing a book from the perspective of a girl with Asperger's syndrome. The panel also includes Jamey Wolff, Program Director for the Center for Spectrum Services; Man Fung Lam, Department of Teaching and Learning, SUNY New Paltz; and two individuals who will share perspectives as a parent and an individual with Asperger's. The intended audience for this discussion is general education teachers, special education teachers, and preservice teachers who currently work (or intend to work) with students in kindergarten through twelfth grade.

**A complimentary copy of the book *Rain Reign* will be provided to the first 100 participants who register for this workshop, courtesy of Dr. Michael Rosenberg, Dean of the School of Education, SUNY New Paltz. Immediately following the panel discussion, Ann Martin will be available for a book signing for all those interested. Please note that no books will be sold at the event. Those not eligible to receive a complimentary copy are welcome to bring their own copy of the book to the event.**

# Teacher Language Book Study

Positive teacher language can support students in gaining academic skills, build a positive community, and developing self-control. *Power of Our Words* by Paula Denton will be the text for the basis of our conversation and reflection of the language educators use to support children. The topics in the book include guidelines for Teacher Language, open-ended questions, listening, reinforcing language, reminding language and redirecting language. This group will be facilitated with a different focus from the book for each session. This book study is a great opportunity for educators to discuss and reflect, and delve into the topic of Teacher Language. Come and explore a vision of linking teacher language, CCLS, and 21st century learning.

**All Participants will need access to the book - *Power of Our Words*.**

**Presenter: JoAnn Murphy-Genter**

# Constructivist Teaching and Learning

This seminar will address one of the priorities of the NYS Teaching Standards. Teachers must consider how each student learns. Understanding how to address this in the classroom means that teachers must implement a variety of instructional strategies. Participants will explore how students learn when they “build” the learning for themselves. When students are asked to classify, analyze, predict and create, they begin to think critically and ask questions in order to understand the complex material presented to them in school and in the world.

# Support Group for Morning Meeting Practice in a Responsive Classroom

This support group is for educators that have implemented or are interested in implementing the practice of Morning Meeting as part of the Responsive Classroom. Participants should have background knowledge of Morning Meeting. This is a monthly opportunity to reflect on your practice relating to this topic.

Monthly topics include:

- Ways to integrate Students with Disabilities and ENL students
- Strategies to include Content areas such as SS, Science and Mathematics
- How to include Interactive Modeling
- Morning Meeting to support PBIS programs

This is an opportunity for educators to share, plan and work together to develop ideas for the four components of Morning Meeting (greetings, sharing, group activities and morning message) that meets the needs of all students.

# Co-Teaching Strategies to Scaffold Learning for the Needs of all Students

Presenter: JoAnn Murphy-Genter

There are many challenges to meet the Common Core Learning standards and address the needs of all the students. An essential component is to scaffold the learning to make sure all students have an access point to the CCLS. The goals are:

1. Better understand the ELA CCLS and how they apply to all students
  2. Develop co-teaching strategies for the regular education teacher and the special education teacher or ENL teacher to work together to meet the needs of the students
  3. Develop more scaffolding strategies in the area of ELA to respond to the rigor of the standards that apply to all content areas
  4. Develop broad range of instructional strategies to make subject matter more accessible.
  5. Explore and use a variety of resources to meet the diverse needs of students and promote achievement.
  6. Revise lessons to incorporate the scaffolding strategies for the student.
- Outcome: Better communication between co-teachers and lessons that address the needs of all students to promote achievement.

NYS Teaching Standards addressed: Standard 1.3, 2.3, 2.4, 2.5, 3.1, 3.4,

**Dates:** January 25, February 8 and  
February 22, 2017
